2012 or Why the World Isn't Ending Just Yet! [sound recording] / Jim Kenney. Wheaton, IL : Theosophical Society in America, c2010. 2 sound discs (109 min.)

The latest new age apocalyptic preoccupation is based on a curious misreading of the ancient Mayan calendar. This interpretation (rejected by Mayan elders and serious scholars alike) suggests that the calendar ending in 2012 portends a world-ending or at least world-changing cataclysm in that year. Jim Kenney examines a great story woven from poor scholarship and the hope of a better world.

The Brain that Changes Itself : stories of personal triumph from the frontiers of brain science / Norman Doidge. New York : Penguin Books, 2007. 427 p.

A new science called neuroplasticity is overthrowing the old notion that the human brain is immutable. Psychoanalyst Doidge traveled the country to meet both the brilliant scientists championing neuroplasticity and the people whose lives they've transformed--people whose mental limitations or brain damage were seen as unalterable. We see a woman born with half a brain that rewired itself to work as a whole, blind people who learn to see, learning disorders cured, IQs raised, aging brains rejuvenated, stroke patients learning to speak, children with cerebral palsy learning to move with more grace, depression and anxiety disorders successfully treated, and lifelong character traits changed. Using these stories to probe mysteries of the body, emotion, love, sex, culture, and education, Dr. Doidge has written an inspiring book that will permanently alter the way we look at our brains, human nature, and human potential.
