

The Theosophical Society in Detroit

Chartered in 1916 as a Branch of the Theosophical Society in America

presents

DR. ANDREW CLEWELL

WHAT HAPPENS TO ME WHEN I DIE?

Friday, February 1, 2019

Doors open at 6:30 p.m. Lecture begins promptly at 7:00 p.m. **\$5 suggested donation**
From 6:30 to 6:55 is time for socializing, browsing through the bookstore and library, and enjoying light refreshments.

Classical theosophical authors revealed much about the age-old question of what happens after death. Their explanations have been independently corroborated by multiple sources, including the subjective observations of astral travelers and rigorous scholarship. Andre will describe the sequence of normal activities, and the importance of these activities will be emphasized in terms of our spiritual evolution. He will touch on fascinating, aberrant inter-life behavior such as that of earth-walkers and ghosts.

Saturday, February 2, 2019

Doors open at 9:30 a.m. Lecture begins promptly at 10:00 a.m. **\$5 suggested donation**
From 9:30 to 9:55 is time for socializing, browsing through the bookstore and library, and enjoying light refreshments.

CLAIRVOYANT INVESTIGATION INTO THE STRUCTURE OF MATTER

In 1895, Annie Besant and C. W. Leadbeater published the first of a series of detailed clairvoyant observations of subatomic structure. They referred to their work as occult chemistry. Science did not even recognize that atoms had internal structure until 1912. Their clairvoyant studies correlated with the periodic table of the elements and atomic weights. They described 4 new elements unknown to science, and were the first to discover isotopes. Subsequent analysis led physicist Stephan Phillips to relate their investigations to quantum mechanics and superstring theory with striking consistency. He also linked them to Pythagorean concepts and the Kabbalah. Their investigations unequivocally link science to spirituality. Both scientists and non-scientists will find this talk fascinating. It demonstrates what is referred to in the 3rd Object of the Society "the unexplained laws of nature and the powers latent in humanity".

A light lunch will follow, and Andre will then speak on

ECOSPIRITUALITY: THE WAY FORWARD

To attain universal brotherhood, we must first satisfy the human values associated with ecospirituality. These values are ecological, socioeconomic, cultural, and personal, and they are identifiable with planes of consciousness recognized by Theosophy. Attainment of ecospiritual values is realized in large part by recovering degraded natural ecosystems, which H. P. Blavatsky specifically called for in 1879. Global warming is just one example of the environmental ills that can be significantly ameliorated by ecological recovery. This talk is partially a photographic essay that portrays examples of ecological recovery from around the world. Included is the reconnection of fragmented habitat for Giant Pandas in southwestern China conducted by the speaker, who is a restoration ecologist as well as a Theosophist.

Andre has been a member of the Theosophical Society since 1995 and is president of the Midsouth Federation of the Theosophical Society in America. He is an Oberlin College graduate, holds a Ph.D from Indiana University, and is widely recognized as a leader in the field of ecological restoration.
