

PARAPSYCHOLOGY AND LATENT POWERS

Ashby, Robert H., *The Guidebook for the Study of Psychical Research*, 1973, 190 pages.

Answering the questions most often asked about the paranormal, this book provides tools for investigations into ESP, giving lists of research organizations, publications, and libraries, separating the serious resources from the sensational.

133.8 Ash GBS

Bendit, Laurence J., *Paranormal Cognition: Its Place in Human Psychology*, 1944, 79 pages.

An essay presented to the Department of Medicine of the University of Cambridge examining “psy functions” and how to address them from a psychotherapeutic approach in order to get them into a fuller perspective.

T B433 PC

Bendit, Phoebe, *Our Psychic Sense: A Clairvoyant and a Psychiatrist Explain How it Develops*, 1984, 227 pages.

An exploration into what has been referred to as the “sixth sense,” considered to be a window opening onto the real world of our inner consciousness. Bendit explains how this sense manifests and evaluates its usefulness to humanity.

T B433 PS 1984

Besant, Annie, *Hypnotism and Mesmerism*, 1948, 65 pages.

A study of the history and development of these two related, but different, phenomena. Exploring the factual evidence, it shows that hypnotism is based on producing a fatigue of the nerves while mesmerism rests on the transfer of vital energy to the subject.

T B463 HM (Mini)

Blavatsky, H. P., *Dynamics of the Psychic World*, 1972, 132 pages.

A collection of writings by H. P. Blavatsky, co-founder of the Theosophical Society, on magic, mediumship, Psychism, and the power of the spirit, warning against the dangers of uncontrolled psychism and laying the groundwork for safe, holistic development.

T B614 Psa DPW or 133.8 Psa DPW

Blavatsky, H. P., *Practical Occultism; and, Occultism versus the Occult Arts*, 1981, 106 pages.

Two articles herein deal with the difference between “occultism” as a path of self-knowledge and moral and spiritual development, and the “occult arts,” that is, the manipulation of psychic powers in man and forces in nature.

T B614 PO 1981 (Mini)

Cooper, Irving S., *Methods of Psychic Development*, 1923, 113 pages.

A serious and complete outline of the subject, examining different levels of psychic abilities, their place in human evolution, the dangers and potentialities of methods usually advised to develop them, and the safe path towards an integral evolution of the inner man.

T C785 MPD 1923 (Mini)

Duplessis, Yvonne, *The Paranormal Perception of Color*, c1975, 117 pages.

Applying methods of parapsychology, this book presents research from experiments on the appearance of color images in our mind without any direct stimulation of the corresponding sense.

133.8 Dup PPC

Edmunds, H. Tudor, *Psychism and the Unconscious Mind*, 1968, 254 pages.

A collection of articles from the *Science Group Journal* of the English Theosophical Research Centre, that examine subjects such as clairvoyance, spiritual and psychic perception, etheric vision, psychometry, and telepathy.

T T343 PUM

Ellison, Arthur J., *The Paranormal: A Scientific Exploration of the Supernatural*, c1988, 159 pages.

Guided by the criterion that facts come first and scientific theories second, the author investigates numerous extraordinary occurrences and experiments and explains how readers may investigate the subject and carry out similar experiments.

133 Ell P

Griffin, David Ray, *Parapsychology, Philosophy, and Spirituality: A Postmodern Exploration*, c1997, 339 pages.

Examining why scientists, philosophers, and theologians have held parapsychology in disdain, Griffin identifies four types of repeatable phenomena and articulates a constructive postmodern philosophy that allows parapsychological evidence to be taken seriously.

133 Gri PPS

Guiley, Rosemary E., *Harper's Encyclopedia of Mystical & Paranormal Experience*, 1991, 666 pages.

A comprehensive encyclopedia, reviewed by experts, that features psychic phenomena, in-depth explanations of different mystical and divinatory techniques, spiritual traditions, sacred places, and major figures in the field.

133 Gui HEMP

Hodson, Geoffrey, *The Science of Seership*, 1985, 224 pages.

A study of the faculty of clairvoyance, its development and use, together with examples of clairvoyant research under test conditions with scientists in various fields, such as astronomy, bacteriology, physics, psychology, and medical diagnosis.

T H669 SS

Irwin, H. J., *An Introduction to Parapsychology*, c1989, 321 pages.

The origins of parapsychological research and investigations are critically reviewed in this book, which provides an introductory survey of parapsychologists' efforts to explore the authenticity and bases of anomalous and apparently paranormal phenomena.

133.8 Irw IP

Kautz, William H., *Opening the Inner Eye: Explorations on the Practical Application of Intuition in Daily Life and Work*, c2003, 412 pages.

The latest discoveries in the workings of intuition and its applications to individual daily life are presented in all of the professional areas that depend upon information and knowledge for their advances, outlining the broad conditions under which intuition can be used.

153.44 Kau OIE

Leadbeater, C. W., *Clairvoyance*, 1968, 226 pages.

The author, who was himself a highly developed clairvoyant, discusses this interesting subject explaining different kinds of clairvoyance as well as methods of development, pointing out dangers and those methods that can be safely recommended.

T L469 C

Long, Max F., *Psychometric Analysis*, 1959, 118 pages.

Describing the psychometric analysis of people's features such as intelligence, health, and character, Long describes how to perform these readings by means of a pendulum, using personal objects, pictures, or signatures.

133.8 Lon PA

McCreery, Charles, *Science, Philosophy and ESP*, 1967, 199 pages.

Using an electroencephalograph to measure what is going on in the psychic's body, especially in the brain, generates scientific predictions about what findings should be expected. Phenomena like ESP and telekinesis are capable of being empirically tested.

133.07 McC SPE

Radin, Dean I., *Entangled Minds: Extrasensory Experiences in a Quantum Reality*, c2006, 357 pages.

Based on scientific evidence the author shows that psychic phenomena such as telepathy, clairvoyance, and psychokinesis are real, as an unavoidable consequence of the interconnected, entangled physical reality we live in.

133.8 Rad EM

Rhine, Joseph B., *The Reach of the Mind*, 1947, 234 pages.

The author, a pioneer of experimental investigation of "psi phenomena," reports the results of tests carried out at Duke University, postulating these phenomena as a challenge to materialist conceptions.

130 Rhi RM

Rhine, Louisa E., *ESP in Life and Lab; Tracing Hidden Channels*, 1967, 275 pages.

A clear and readable account of all aspects of extrasensory perception and related abilities that gives a vivid picture of the research that established them in terms of both life experiences and laboratory experiments.

133.8 Rhi ELL

Ryzl, Milan, *Parapsychology; A Scientific Approach*, 1970, 216 pages.

Presenting evidence that psychic phenomena indeed exist, this scientist examines the whole range of them—clairvoyance, telepathy, precognition, etc.—describing the history, experiments and expected future of each area.

133.8 Ryz PSA

Savage, Helen, *Psychic Powers*, 1948, 125 pages.

A manual presenting a logical and philosophical explanation of the existence of psychic powers and paranormal activities—their nature, as well as their potential dangers—covering phenomena such as mediumship, hypnotism, and clairvoyance.

T T343.1 TM no.11 (Mini)

Sheldrake, Rupert, *The Sense of Being Stared At: And Other Aspects of the Extended Mind*, c2003, 369 pages.

Based on a database of 4,000 case histories, 2,000 questionnaires and 1,500 telephone interviews, the author explores the intricacies of the mind and phenomena like the power of attention, telepathy, remote viewing and premonitions.

133.8 She SBSA

Stoeber, Michael, *Critical Reflections on the Paranormal*, c1996, 224 pages.

A collection of essays discussing various aspects of paranormal phenomena such as telepathy, psychokinesis, trance-mediumship, near-death experiences and past-life memories. It reflects on what is reasonable to believe about them and why.

133 Sto CRP

Wedgwood, James I., *Varieties of Psychism*, 1914, 109 pages.

Establishing the distinction between lower and higher psychism and classifying the various phases of it, Wedgwood explains their *modus operandi* and development as an evolutionary extension of our present faculties, acknowledging nothing supernatural about them.

T W416 VP (Mini)

Walker, Claire G., *The Psychic Revolution of the 20th Century and Our Psychic Senses*, c1997, 166 pages.

A discussion of the existence and role of psychic sense as a direct inner knowing of a situation, distinguishing it from psychic power, and postulating that, though not necessarily spiritual, this sense will be important in humanity's evolutionary future.

133.8 Wal PR

Walker, Kenneth, *The Extra-Sensory Mind*, 1961, 256 pages.

Considering various psychological theories concerning the nature and function of the unconscious mind, the author contends that this portion of the psyche is responsible for so-called paranormal phenomena, such as ESP, apparitions, and precognition.

133.8 Wal ESM

Wheatley, James, *Philosophical Dimensions of Parapsychology*, c1976, 483 pages.

Philosophical essays by distinguished philosophers and scientists, presented in five sections, examine the relationship of psychic abilities with philosophy, cognition, precognition, survival after death, and science.

133 Whe PDP

Wolman, Benjamin B., *Handbook of Parapsychology*, 1977, 967 pages.

Through the contribution of thirty-two scientists interested in the field, this handbook brings together all complex aspects of parapsychology including empirical data research techniques, theories, and hypothetical systems.
