The Metaphysical Symbolism of the Human Body [sound recording] / Robert Bonnell. Wheaton, IL : Theosophical Society in America, p2010, c1993. 1 sound disc (67 min.)

According to esoteric philosophy, there is a mysterious correspondence between the human body and the universe; this is known as the relationship of the macrocosm to the microcosm. As Emerson said, "The universe is represented in every one of its particles. Every thing in nature contains all the powers of nature. Every thing is made of one hidden stuff." In this talk, a retired doctor gives numerous fascinating examples of how our bodies reflect the greater cosmos.

Opus Dei : an objective look behind the myths and reality of the most controversial force in the Catholic Church / John L. Allen, Jr. New York : Doubleday, 2005. 403 p.

The first serious journalistic investigation of the highly secretive, controversial organization Opus Dei provides unique insight about the wild rumors surrounding it and discloses its significant influence in the Vatican and on the politics of the Catholic Church. Opus Dei (literally "the work of God") is an international association of Catholics often labeled as conservative who seek personal Christian perfection and strive to implement Christian ideals in their jobs and in society as a whole. It has been accused of promoting a right-wing political agenda and of cultlike practices. Its notoriety escalated with the publication of the runaway bestseller *The Da Vinci Code* (*Opus Dei* plays an important and sinister role in the novel). With the expert eye of a longtime observer of the Vatican and the skill of an investigative reporter intent on uncovering closely guarded secrets, John Allen separates the myths from the facts.
